

Yash Mihani

Machine Learning & Python Software Engineer | Email: yash.mihani@example.com

PROFESSIONAL SUMMARY

Software engineering candidate with practical background in Python development, Machine Learning algorithms, and Natural Language Processing pipelines. Experienced in preprocessing unstructured text, vector representations, and building REST APIs.

CORE TECHNICAL SKILLS

Python, SQL, MySQL, Machine Learning, Natural Language Processing, NLP, Scikit-learn, Pandas, NumPy, Git, GitHub, Docker

KEY TECHNICAL PROJECTS

NLP Resume Screening & Job Matching System

- Engineered text extraction with pdfplumber and NLTK tokenization & lemmatization.
- Generated TF-IDF matrices and evaluated cosine similarity to rank resume fit.
- Implemented skill extraction dictionary and structured MySQL database schema.

Machine Learning Predictive Modeling

- Applied Scikit-learn, Pandas, and NumPy for feature engineering and predictive analysis.
- Packaged applications using Docker containers and integrated Git version control.

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Relevant Coursework: NLP, Machine Learning, Database Management Systems, Data Structures
